BE NATURAL, BE FREE!

Every two seconds a forest area - sizing a football field - is destroyed!
We believe in developing a Sustainable Chemistry as we believe that
the respect for the environment is part of our responsibility.
With a few simple, everyday efforts you can help us to reduce pollution,
consume less energy and water and produce less waste:

- Download our brochures from our website
- Spread the information to your customers through internet and @mail
- Print brochures only if really necessary choosing Recycled Paper

Do like us: **BE NATURAL, BE FREE**

INCHIOSTRO BICOMPONENTE A BASE DI POLIMERI SILICONICI

PREPARAZIONE:

L'aggiunta del 5% massimo di TEXISIL PIGMENT nel TEXISIL CLEAR BASE permette di ottenere colori trasparenti per fondi chiari, nel TEXISIL OPAQUE BASE permette di avere colori coprenti per fondi scuri.

L'eventuale aggiunta del diluente permette di adeguare la viscosità in funzione dell'effetto finale desiderato.

Catalizzare la base (rapporto 90:10) prima della stampa.

Il pot-life diventa di 12 ore.

TWO-COMPONENT SILICONE POLYMER INK

PREPARATION:

The addition of up to 5% TEXISIL PIGMENT to TEXISIL CLEAR BASE allows to achieve transparent colour on light fabrics, whereas the addition of the same percentage of TEXISIL PIGMENT to TEXISIL OPAQUE BASE allows to obtain opaque colours on dark fabrics.

The use of the thinner allows to adjust ink viscosity according to the desired effect.

It is recommended to catalyze the base (ratio 90:10) before printing.

In this case pot-life will be extended to 12 hours.
