

A Reliable and Affordable Cutter for Sign Makers

Friendly Operation

The user-friendly control panel comes with a large 20-digit x 2-line LCD and 14 control buttons, providing easy operation and simple navigation. The LCD allows users to glance or monitor all operational settings including offset value, quality mode, cutting speed and cutting force. 4 sets of prestored job settings for frequently used material can be stored in Puma III. These settings include cutting speed, blade offset, cutting force, as well as movement speed during tool-up and cutting.

Main Features

- Digital servo motor driving up to 24 inches per second.
- Up to 400 grams of cutting force.
- Tri-port connectivity provides you with greater flexibility.
- Provide superior tracking capability.
- A standard Accu-Aligning System (AAS II) for contour cutting.

The Puma III series features a standard Accu-Aligning System(AAS II) to guarantee precise contour cutting by detecting the registration marks on digitally produced

Significant functions include:

1 st-Mark Auto-Detection	Segmental Positioning
4-Point Positioning	Multiple Copies

Tracking Capability

The exclusive grid drum is precisely engineered to provide superb tracking capability.

Puma III is a versatile machine with the ability to plot and cut without having to alter the plotter's mechanical configuration. For vector cutting, simply install a blade holder; for plotting, simply install the drawing pen or a ballpoint pen.

Tri-port Interface Connectivity

Puma III supports tri-port connectivity with USB, serial and parallel ports. The USB port provides faster and convenient data transmission between computer and Puma III, the tri-port connectivity provides sign makers a great flexibility for data transmission.
