гр.Пловдив 4003, ПК 100, ул.“Ибър” №31, тел. 032/94 58 85, факс: 96 07 99, info@microasu.com

**MC1600****Manual, no electricity required**

That means there is no warm-up time and your material will move quickly through the Laminator. All you have to do is turn the handle! Also, little maintenance is required compared to hot roll laminators.

Better, safer laminating experience

The plastic laminate won't melt and stick to the rolls as it can with hot laminator, meaning you won't experience a burnt plastic odor. And no heat means no chance of burns and no potential fire hazard -- all reasons why cold laminator is a practical choice for schools, offices, and sensitive work environments. They are ideal with untrained or unsupervised staff who have a need to use the machine.

Model	MC1600
lamination width	1600mm
Speed arrange	0-1000m/min
Power supply	AC110V/220V,50/60HZ
Roller lifting max height	20mm
Gross weight of machine	118Kg
Packing dimension	1934*554*535mm
