

## JQ-2515 Cloth Laser Cutting Machine With Auto-reels

### Cloth laser cutting machine features,

large material automatically.

- The rolls of the machine are able to roll up the Improved the working efficiency greatly.
- Usually, the laser tube is installed above the machine body. This machine's laser tube is installed in the machine body so it is more secure.
- There are two control panels on the machine. The users could control the machine at both sides.
- DSP control system and moderate using environment.
- Some parts are imported and more durable like mirrors and lens, rails, motors. etc.
- Scientific ventilation equipments, high power exhaust fan and strong honeycomb worktable play a vacuum adsorption, which can make the soft material very flat.

### Parameter of JQ-2515 Cloth Laser Cutting Machine

|                          |   |
|--------------------------|---|
| Model                    | JQ-2515 Cloth Laser Cutting Machine                         |
| Working area             | 250cm*150cm / 98in*59in (X axis*Y axis)                     |
| Equipment Dimension      | 350cm*220cm*175cm<br>138in*87in*69in (X axis*Y axis*Z axis) |
| Laser power              | 60W/80W/100W/130W/150W                                      |
| Laser type               | CO2 sealed laser tube, water-cooled                         |
| Engraving speed          | 0-6000mm/min  |
| Cutting speed            | 0-5000mm/min  |
| Total power              | <2kw/h  |
| Power supply             | 220V/50HZ , 110V/60HZ                                       |
| Graphic format supported | BMP, PLT, DST, DXF, AI                                      |
| Software supported       | CorelDraw, Photoshop, AutoCAD, T                            |
| Driving system           | 3 phases stepper motor                                      |
| Net Weight               | 1250kg  |
