

## Technical data

## **DOS 060**

**Description:** this adhesive film is to be applied on the back of mirrors in order to hold back the glass splinters in case of shock or fire, in gymclubs, exhibition halls, night clubs, etc...

For: designed to secure the silver mirrors without having recourse to tempered glass which is responsible for optical distortions, in areas like: fitness clubs, dancing schools, showrooms, exhibition halls, lifts, night clubs...

**Application method:** on the backing mirror with soapy water.

Glass maintenance: the film may be cleaned with soapy water, 30 days after the application. Any abrasive products that could scratch the film, are not recommended. Do not apply any stickers, or any other type of adhesives on the film.

**Durability:** 15 to 20 years for vertical application in Central Europe.

Storage: 2 years from the delivery date. This film has to be kept away from excessive humidity. It also has to be stored away from direct sunlight at a temperature under 38°C.

Important factors: the glass surface used must be entirely dirt free and any grease or other filth must be removed prior to installation.

Material	Polyester 75 microns
Adhesive	Acrylic polymer 25 gr/m <sup>2</sup>
Tint	Clear
Release liner	Siliconed paper 100 microns
Break strength	17.5 daN/cm
Elongation	100 %
Application	Backing mirrors
U.V. resistance	Excellent
Thermal resistance	from -20°C to 80°C
Application temperature	Minimum 5°C
Dimensions	48'' x 100'
