

Структура на алуминиев сандвич-панел

The structures and features

Heat-resistant

Excellent heat-resistant, can keep the real color long under high temperature.

Sound-insulation

Sound-insulation and quakeproof reach to the advanced technique of the world.

Light Weight

Convenient transportation and reduce the cost

Heat capability

After 24 hours testing of alternating hot and cold, it was approved that can be withstand the environment temperature as low as -50℃, as high as 60℃.

High Intensity

Compounded by high-intensity aluminum alloy and adhesive film, with high intension and peel off reach to 7-12KG/CM, and it was approved the Anti-leeway up to class 1 by testing.
