

Our two-side laminated display boards are the perfect print product for top-quality signage, tent cards and other POS display solutions. They offer an eco-friendly alternative to mineral oil-based POS materials such as foam boards and PVC signs.

KATZ DISPLAY BOARDS are typically laminated with glazed paper and are available in different sizes and thicknesses ranging from 1.2mm to 5.0mm.

Please contact us if you are interested in advanced lamination options using high-quality films and special papers for example solvent.

STANDARD THICKNESSES

1.2 | 1.6 | 2.0 | 3.0 | 5.0mm

PRINTING TECHNIQUES

Offset printing | digital printing | screen printing

LINER

Woodfree half mat coated illustration printing paper
