Oil-Less Decal Transfer

- Easy to use waterslide heat transfer paper compatible with all Oil and Oil-Less laser copiers and printers. This easy to use decal paper is used for delicate decorations on hard surfaces like glass and ceramic.

User instruction CopyFUN White

1

Print on the glossy side of 'CopyFUN White Plus Clear' heat transfer paper. (Do not mirror image).

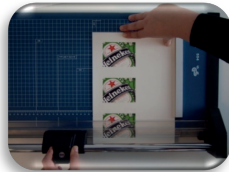

6

Remove water from under the transfer by gently rubbing the cloth or application rubber from one side to another!

2

Trim around the image.

Prepare yourself with:

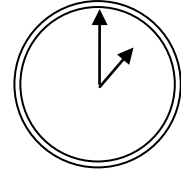

- 1 Bowl of warm water
- 1 Mug
- 1 Cloth or app- rubber
- 1 Oven

3

7

The mug has to air dry for at least 2 hours.

8

Finish the mug by baking it in an oven:

- Preheat: 2 min. at 200°C
- Bake: 5 min. at 200°C

4

Place the transfer in a bowl of warm water for 90 seconds!

9

Caution product is now very hot!

Take out the mug and let the mug cool down totally before handling.

5

Take the mug and transfer in your hand. Softly press the transfer with your thumb against mug and gently remove carrier paper by pulling!

10

"CopyFUN" It's so easy to work with!
