Experience UniTarp

UniTarp is PVC fabric with 100% sol-coated for truck cover, side curtain, trailer, and general covers, which has a lot stronger physical strengths such as tear strength and adhesion strength, compared to the laminated fabrics under the same standard condition.

High value & excellent performing UniTarp is the most appropriate and durable choice for your vehicle and the various availability of UniTarp gives you more options for your application.

BENEFITS OF UNITARP

Competitive price We offer you the most competitive price with the best quality.

How?

As we are supplied with high quality resins and other chemical substances by our group of related companies, the quality of our PVC sol mixture is excellent and cost effective. And our 35 year-of-experience in PVC tarpaulin business enables us to operate our system more efficiently and improve the quality by our own skills. And these enable us to offer you the most competitive price with the best quality.

Quality Are you seeking for stronger physical strengths in tarpaulins? We can provide you strong and better physical property in PVC tarpaulin

How?

100% Sol-coated product for superior physical strengths

UniTarp is produced by 100% sol-coating method which is obviously different from laminated tarpaulins. The PVC sol is spread on both sides of the base fabric (low shrinkage & high tenacity) and strongly combined with the fabric through the cutting-edge coating line during the manufacturing process. It provides a lot stronger physical strengths such as tear and adhesion strength, compared to the laminated fabrics under the same standard condition.

Experience UniTarp, you will be more satisfied.

Customization Optional treatments such as Flame retardant, Anti-Mildew, Anti-cold crack, lacquering and various colors and widths are available in UniTarp. We can customize all items upon our customers' requests.
