

ORAJET® 3959

NEW Petrol resistant digital printing film from ORAFOL:

Now advertising prints near fuel pumps can maintain durability and great looks.

Maintaining durability of digitally printed advertising decals applied near the fuel pumps on gas tanks can be a real challenge. The new ORAJET® 3959 has been developed specifically to solve this problem. The material is resistant to the occasional petrol spillage when combined with ORAGUARD® 259.

The material is printable with solvent based inks, UV- or Latex inks.

Product benefits include:

- Digital printing film
- Petrol resistant to the occasional petrol spillage*
- Printable with solvent based inks, UV- or Latex inks
- Premium cast white PVC film
- Available as glossy
- For long-term graphic applications and promotions on petrol stations (pumps) and on road tankers

**) when combined with ORAGUARD® 259*

Recommended Laminating Film:

- ORAGUARD® 259
(glossy surface)

Engineered to Perform Better™
