

be.tex® Magic FR

Art.No. 4323-XXXX-26-BE

Description

Be enchanted by be.tex® Magic, a sound-permeable lightbox textile. It is smooth, crease free and soft right from the first contact. But the true look becomes visible through sublimation printing. The colours show their best and flashlights don't stand a chance. Well suited when light boxes should absorb sound. Thoroughly treated, the printed textile can be carefully folded. Woven fabrics must be cut hot, otherwise the textile will fray at the cut edges. Important: Run a print test! Many factors influence the textile during printing and application. All technical data were determined according to the current state of measurement technology and reflect the values of the measurement sample. Despite the highest quality standards, there may be production deviations – all information are legally non-binding and without guarantee.

Main Application

Lightbox

Applications

Banner
Curtain
Display Frame System
Light boxes
Stand Construction

Features

Crease resistant
No flashlights
Soft

Facts
