

be.tex® Samba® FR

Art.No. 04384-XXXX-6266

Description

be.tex® Samba® FR - the original, that sets the benchmark. The robust all-round talent for impressive advertising. Its easy handling and the excellent display of contrasting colours have made millions of good impressions. For very large projects, now also available in 5 metre width: be.tex® Samba® Twin FR. Tip: Use only 5 metre wide Samba® FR if different widths are used next to each other. This way you avoid deviating printing results. Paper transfer printing on the uncoated side. Latex printing for backlighting requires a high ink application. Carefully handled, the printed textile can be folded carefully. Self-adhesive flat piping cannot be used because the uncoated side has a lotus effect. Water column: coated side > 900 mm, uncoated side > 650 mm. Important: Make a print test! Many factors influence the textile during printing and application. All technical information has been determined according to the current state of the art and reflects the values of the test sample. Despite the highest quality standards, production-related deviations may occur - all information is not legally binding and is subject to change.

Main Application

Lightbox

Applications
